---

### EDUCATION

**Doctor of Philosophy: Computer Science and Engineering, University at Buffalo (SUNY)**, Buffalo, New York.

**Expected Graduation:** June 2028

**Advisor:** Dr. Kenneth Joseph

**Research Areas:** Computational Social Science; Large Language Models; Natural Language Processing

**Master of Science: Computer Science and Engineering, University at Buffalo (SUNY)**, Buffalo, New York, June 2024

**Bachelor of Arts: Cognitive Systems, University of British Columbia**, Vancouver, Canada, May 2022

**Minor:** Psychology

### SKILLS & TOOLS

**Large Language Models:** Llama, BERT

**Data Science Tools:** SQL, R, PostgreSQL, Firebase Realtime Database, Pyspark

**Programming Languages:** Python, Java, C++, C, Haskell, JavaScript

**Tools:** Git, Jupyter, Visual Studio, LaTeX, Flask, Pandas, Matplotlib

**Languages:** English (Fluent), Spanish (Fluent)

### RESEARCH EXPERIENCE

**Research Assistant, cUBe Lab at the University at Buffalo, Buffalo, NY. June 2023 – Present**

- Constructed tools for stance detection using Large Language Models applied to 15 million tweets from the 2020 US Presidential Election. Ran experiments to evaluate LLM prompts and parameters.
- Published peer-reviewed paper: A. Caceres-Wright et al., “Explicit Stance Detection in the Political Domain: A New Concept and Associated Dataset”, SBP-BRIMS 2024. **Runner Up: Best Student-Led Paper Award**
- Presented peer-reviewed poster: A. Caceres-Wright, G. Bunn, S. Shuster, and K. Joseph, “Who supports Bernie? Analyzing identity and ideological variation of Bernie supporters on Twitter”, IC2S2 2024.
- Investigating how individuals express identity online and how those who share identities speak about shared topics

**Student Assistant, X-Lab at the University at Buffalo, Buffalo, NY. June 2023 – August 2023**

- Researched and developed indices of interdisciplinarity using natural language processing
- Completed a literature search aiming to incorporate best previous results into our index

### TEACHING EXPERIENCE

**Teaching Assistant, University at Buffalo. Buffalo, NY. January 2026 – Present**

- Developing the first ever offering of *AI 104: Introduction to Computational Expression* alongside the professor
- Alongside regular TA duties I helped develop in class activities and other assessments
- Presented an invited lecture on AI in Practice, discussing common ways LLMs and other AI tools are used in industry

**Teaching Assistant, University at Buffalo, Buffalo, NY. August 2025 – December 2025**

- Facilitated learning for over 100 students enrolled in CSE 421/521: Operating Systems
- Guided students through two projects implementing operating system fundamentals
- Held weekly office hours to support student learning

**Teaching Assistant, University of British Columbia, Vancouver, BC. January 2020 – December 2020**

- Assisted in the delivery of three semesters of CPSC 210: Software Construction
- Duties included running labs, holding office hours, and grading assignments and exams
- Mentored ~30 students per semester as they worked on a semester-long project. Helped guide design and implementation, and helped debug issues, through weekly 1:1 meetings

### INDUSTRY EXPERIENCE

**Data Analyst (Intern), Quanturisk Analytics Ltd, New York, NY, September 2024 – June 2025**

- Joined the company while it was an early stage startup
- Curated high quality corporate dataset with quality controls
- Ran statistical analysis on financial data, used results to identify key financial metrics for further analysis
- Developed financial models to study corporate resilience to sustainability risk
- Created models to accurately predict missing corporate data when necessary
- Designed a matching algorithm to allow data from different sources to be accurately assigned to the correct entities

## PROJECTS

### **Text-to-Speech Application for Low Resource Languages.** Python, Huggingface, Transformers

- Created a Text-to-Speech (TTS) system for a low resource Indigenous Language from the Amazon
- Experimented with several different approaches and models, compared end results, and wrote a report summarizing methods and findings

### **Simulating Trading Models.** Python, QuantConnect, Zipline, Pandas, Matplotlib

- Developed simple stock trading models based on various technical indicators such as the Relative Strength Index
- Backtested the models using various frameworks on the stocks of the S&P 500

### **Museum Interactive Scavenger Hunt.** Python, Flask, Firebase Realtime Database, Javascript, CSS

- Implemented a full-stack application for the Niagara Aerospace Museum for visitors to complete a scavenger hunt
- Allows curators to enter or edit clues and exhibits, and visitors to customize the length and difficulty of their hunt

### **Financial Literacy Application: UB Hacking: Fall 2022 (Hackathon, 1st Place).** SQL, JavaFX

- Won first place prize with a prototype JavaFX application aimed at centralizing financial information new immigrants may find useful, such as on banking, Free Application for Federal Student Aid (FAFSA), housing, etc.
- Prompted users with a questionnaire to tailor information they were presented. Stored survey responses in a MySQL database along with a username and password for later retrieval

### **Research in Cognitive Systems.** Python, Git, oTree, R

- Worked as a research assistant in a psychology laboratory programming a variation of the public goods game using the oTree framework
- Deployed this software to collect data from ~10 games of 4 players each
- Synthesized results and wrote a report of the findings in context of relevant work

### **Pintos Simple Operating System C**

- Developed part of an operating system as part of a course
- Implemented several scheduling algorithms, priority donation, memory management, as well as some user interaction

### **Text Chat Application C++**

- Implemented both server and client side methods such as sending and receiving messages, and blocking other clients
- Created functionality to analyze server side statistics including IP addresses, and ports of logged in clients, and tracking of number of sent and received messages

### **Modeling Internet Packet Protocols C++**

- Implemented several packet transmission protocols such as the selective repeat and Go-Back-N
- Analyzed performance of the protocols via testing and summarized findings in a report

### **Lossy Image Compression C++**

- Compressed images using a space partition tree which minimizes color variability across partitions
- Precomputed color statistics for each region

### **Book Management System.** Java, JavaFX

- Allowed users to enter and edit details such as title, author, subject, and length
- Saved and loaded data for use across sessions
- Implemented both a command line and graphical user interface

## ACADEMIC SERVICE

**Reviewer**, 2026 AAAI Conference on Web and Social Media (ICWSM)

**Reviewer**, 2025 International Conference on Social Computing, Behavioral-Cultural Modeling & Prediction and Behavior Representation (SBP-BRiMS).

**Reviewer**, 2025 International Conference on Computational Social Science (IC2S2)

**Reviewer**, 2024 International Conference on Social Computing, Behavioral-Cultural Modeling & Prediction and Behavior Representation (SBP-BRiMS).

## UNIVERSITY SERVICE

**Student Host Coordinator**, Artificial Intelligence and Society Department, University at Buffalo. 2025-Present

- Coordinated faculty candidate interviews by liaising between faculty schedulers and PhD students to ensure strong attendance at candidate meetings
- Managed meeting logistics including catering arrangements in collaboration with department administration
- Trained successor coordinators and served as liaison between administrative staff and student volunteers

**Mentor.** AI For Good Design Challenge. University at Buffalo, October 25–26, 2025  
**Alumni Mentor.** Cognitive Systems Society, Tri-Mentoring Program. September 2022–Present

#### PROFESSIONAL MEMBERSHIP

**Member,** Association for the Advancement of Artificial Intelligence (AAAI). September 2025–Present  
**Member,** Association for Computing Machinery (ACM). January 2023–Present

#### AWARDS & HONORS

**Runner Up: Best Student-Led Paper Award.** SBP-BRiMS, September 18–20, 2024  
**First Place Prize, M&T Bank’s An Innovative Way to Promote Financial Understanding and Well Being Award.** UB Hacking: Fall 2022 (Hackathon). November 5–6, 2022  
**Outstanding International Student Award.** University of British Columbia. Academic Year 2017–2018  
**Second Degree Black Belt, Kyokushin Karate.** Ken Wa Kan Karate, New York City. Achieved March 15, 2015

#### RELEVANT COURSEWORK

Graduate Coursework	Undergraduate Coursework
Advanced Topics in Computational Linguistics	Applied Machine Learning
Computational Linguistics	Introduction to Artificial Intelligence
Computational Investment	Basic Algorithms and Data Structures
Data Models and Query Languages	Databases in Data Science
Operating Systems	Functional and Logical Programming
Modern Network Concepts	Software Construction
Computer Security	Pragmatics
Analysis of Algorithms	Understanding and Designing Cognitive Systems

#### CONTINUED LEARNING

**Applied Data Science in Python Specialization.** University of Michigan via Coursera. *Currently in Progress*  
**Mathematics for Machine Learning Specialization.** Imperial College London via Coursera. *Currently in Progress*  
**Machine Learning Specialization.** Stanford University & DeepLearning.AI via Coursera. Completed September 2024  
**Summer School on Foundations of Data Science.** Bryn Mawr College, June 27–28, 2023  
**Bloomberg Accelerator Summer School.** Virtual, June 2023

#### PRESENTATIONS

1. **A. Caceres-Wright**, G. Bunn, S. Shuster, and K. Joseph, “Who supports Bernie? Analyzing identity and ideological variation of Bernie supporters on Twitter”, 2024 International Conference on Computational Social Science (IC2S2)

#### PUBLICATIONS

1. **A. Caceres-Wright**, N. Udhayasankar, G. Bunn, S. Shuster, and K. Joseph, “Explicit Stance Detection in the Political Domain: A New Concept and Associated Dataset”, 2024 International Conference on Social Computing, Behavioral-Cultural Modeling & Prediction and Behavior Representation (SBP-BRiMS)
  - **Runner Up: Best Student-Led Paper Award.**
